## WHY SIMPLICITY GUARANTEES THE HIGHEST DATA RELIABILITY

### The paradox of data quality:

The more complex the system, the less it gets used — and the less it is used, the less reliable the numbers become. CPTRACK is built on the opposite principle.

### Daily. Every user. Every discipline.

Each user spends under 2 minutes per day on data entry. Because the barrier is so low, compliance is near 100%. Twenty submissions per discipline per month means twenty real data points — not one approximation. The resulting dataset cannot be manipulated or reconstructed after the fact.

### Structured capture. Zero interpretation error.

Every field maps directly to a specific column. No free-text quantities. No wrong-column entries. What the contractor captures is exactly what appears in the report — structured, traceable and audit-ready from day one.

## WHY CPTRACK OUTPERFORMS TRADITIONAL REPORTING

### Zero Manual Entry

Field data enters via app — no re-typing, no formula errors.

### 2-Min Daily Capture

Less than 2 minutes per user per day. Maximum compliance.

### Works on Any Phone

iPhone, Android, tablet — no app store, no install needed.

### Discipline Locking

License controls which disciplines each contractor can submit.

### Automatic S-Curve

Built from MAX targets — no manual curve editing ever.

### Live Dashboard

All KPIs colour-coded — green/amber/red at a glance.

### Professional Reports

Six-page A4 navy/gold design. Print or email directly.

### Full Audit Trail

Every CSV retained. Reports numbered. Nothing overwritten.

### Multi-Discipline

Steel, Piping, Equipment, Cabling, Instruments, Electrical.

### Windows Installer

Professional .exe with Start Menu shortcut and license check.
